

Airman Chases 'Flying Saucer'

San Francisco, Sunday.—

A Marine jet fighter pursued a "flying saucer" for 25 miles near Santa Ana, Southern California.

The Marine Corps said that the pilot reported that the saucer was a "fiery object."

Later four other flying saucers were reported seen in the area by a photographer and two pilots of the Northrop Aircraft Company.

They said the "saucers" were flying in formation at an estimated altitude of 20,000ft.
