
STRANGE OBJECT IN SKY

GRAFTON.—A mysterious silvery object, subject of much flying saucer speculation, has been seen over Grafton.

Messrs. Albert Baker and B. C. Bollard, of the Grafton suburb of Westlawn, are convinced an object they saw was not an evening star.

Mr. Baker described the object as having a silvery sheen of great brightness. It was

travelling steadily westward at a high altitude well above a covering of broken cloud.

Mr. Bollard said the object was high in the sky, and must have been of great size. It travelled westward with no apparent up or down movement, and remained in sight for about 20 minutes.
