

"FLYING SAUCER" OVER MACLEAY

The recent report of a "bright fast moving light" over the Clarence district, has brought three reports of similar objects being seen over the Macleay.

Two decline to give names of witnesses, but a third, also on the Upper Macleay, leaves no doubt as to time, or place.

An employee, Ray Smith, of C. M. Wright's Long Flat station, on Lower Creek, told members of the station that about 1.30 a.m. on Thursday he saw an object "it looked like a saucer upside down with a drum on top" moving across the sky from the south towards the north-east.

Mr. Smith said there was a noise, and the object was not moving at a fast pace.
