

## **"Flying Saucers" Reported Again**

**YUMA (Arizona). Mar.**

**10.—A United States Air Force Public Information Officer said last night that several officers had seen "what looked like flying saucers" hovering over the Air Defence Command gunnery course here.**

Captain Phillip Haring said the sightings were reported by more than 20 officers and civilians. He said a formation of a dozen or so disc-shaped objects was seen at a high altitude last Thursday.

An eye-witness said, "I saw them very high to the north-east of Yuma air field. They broke toward the base at terrific speed. Then they hovered over the field and disappeared."
