

New Flying Saucer Reports in U.S.

YUMA (Arizona): A United States Air Force public information officer said last night that several officers had seen "what looked like flying saucers" hovering over the air defence command gunnery course here.

Captain Phillip Hiaring said the sightings were reported by more than 20 officers and civilians.

He said a formation of a dozen or so disc-shaped objects were seen at a high altitude last Thursday.

An eye-witness said: "I saw them very high to the north-east of Yuma Airfield. They broke towards the base at terrific speed. Then they hovered over the field and disappeared."
