

QUORN RAILWAYMEN REPORT FLYING SAUCER

QUORN—Two Quorn railway men reported having sighted a peculiar disc-shaped object in the sky above the township about 10 a.m. last Thursday.

One of the men, Mr. C. Prettyjohn, said that he was engaged on shunting when he saw a shining silver-colored object passing over Quorn locomotive shed at "terrific speed."

He was unable to account for the object which was travelling at a great height.

Mr. A. Harris, who was nearby, said the only way he could describe the object was that it fitted his personal impression of a flying saucer.

He added that it appeared to be disc-shaped, was silver-colored and travelling at high speed.

Both men agreed that it was travelling in a westerly direction.
