

Was it a Flying Saucer ?

Two Quorn men reported seeing a peculiarly shaped object in the sky over the township last week.

One of the men, Mr. C. Prettejohn, who was shunting at the time, saw a shining silver colored object passing over the Quorn locomotive shed at a great height at a terrific speed.

The other man, Mr. A. Harris, who was nearby, said that the only way he could describe the object was that it fitted in with his impression of a flying saucer. He added that it appeared to be disc shaped and silver colored and that it was flying in a westerly direction.

This is not the first instance of such an occurrence being reported in Quorn. Some months ago a party of motorists travelling at night along the Wilmington-Quorn road reported having seen a mysterious object travelling in a westerly direction.
