omenon observed over the past 292 years.

Edgar R. Jarrold, president of the bureau and Australian rep. of the International Flying Saucer Bureau, says recorded reports of flying saucers date back to 1661.

Formed on July 31 last year, the bureau, says Jarrod, is trying to discover the "origin, composition and purpose of flying saucers."

Starting from a handful of serious enthusiasts, the bureau has grown to an organisation with reps in all capital cities in Australia, except Adelaide.

It hopes to make worthwhile contributions to the scientific solution of flying saucers.

Details of past and present sightings from per-

sent sightings from persons interested will be particularly appreciated as the bureau is endeavoring to collate a comprehensive list of Australian and foreign sightings.

It is hoped shortly to publish a magazine with tentative name of the Australian Flying Saucer.
