

Says Nazis Had Flying Saucer

BERLIN, Mon. (A.A.P.). —
George Klein, wartime aviation
adviser, claimed yesterday that
Germany experimented with
the first flying-saucer-shaped
planes.

He said the first crew-carry-
ing flying saucer was tested at
Prague on February 14, 1945.

It reached 40,300 ft. in three
minutes, and flew at 1,375 miles
an hour.

Prototypes and plans were
destroyed, Klein said.
