

NT NATIVES THINK THEY SAW SAUCER

DARWIN, Tues.: Natives living at Garden Point Mission, Melville Island, near the northernmost tip of Australia, have reported a flying saucer.

An unidentified object, travelling at a tremendous speed, was seen in the sky in daylight over Shark Bay, Melville Island, a few days ago.

Natives called out to the superintendent of the Mission (Bro. G. Clark) who also saw the object.

Bro. Clark and the natives said they saw the saucer in a level flight, trailing flame and smoke. It disappeared northward.

Bro. Clark has reported the sighting to Naval Intelligence.
