

## Natives see "saucer"

DARWIN, Tuesday: Aborigines at Garden Point Mission, near the northernmost tip of Australia, have reported seeing a "flying saucer."

An unidentified object flying at "tremendous speed" was seen in the sky at daylight over Shark Bay, Melville Island, a few days ago.

The natives called Brother G. Clark, Mission Superintendent, who also saw the object.

Brother Clark and the Natives said they all saw a "flying saucer" in level flight, trailing flame and smoke, as it disappeared northward.

Brother Clark has reported the incident to Naval Intelligence.

The natives had not previously heard of a "flying saucer."
