

RKO PRODUCER Edmund Grainger may go to the "flying saucer" stories one better when he brings to the screen his latest story "Space Pioneer." The science-fiction film will deal with a "space island" hovering high above Earth. Artists of the stature of Salvador Dalí will plumb their imaginations for the exact design of this "island" and the production will be made with the attendant secrecy of A-Bomb tests.

. . . .

In mechanics, the foot-pound is the unit by which work is measured, or the amount of energy required to raise a weight of 1 lb. through a distance of one foot.
