

# "SAUCERS" AT BATLOW UNDER EXPERT PROBE

**MELBOURNE, Saturday.—Australia's Flying Saucer Investigation Committee intends to examine "extraordinary" reports of unidentified objects seen near Batlow (NSW).**

The committee which is composed of four members of the Astronomical Society of Victoria and one woman dealt with several flying saucer reports at its meeting this month, but decided to concentrate on the Batlow report.

The Batlow resident has not been named because the committee treats all the reports it receives as confidential.

Secretary of the committee L. Whitney said many observers of

**many observers of strange aerial phenomena got "cold feet" because they feared publicity and ridicule.**

The Batlow report said

that seven times between May 18 and July 6 balloon-like, luminous spinning objects had been seen high in the sky.

Each time four objects had been seen between 7 pm and 11.15 pm on clear nights and sometimes twice a week.

**They were glowing red and spinning as they moved backwards and forwards at a high speed across the sky.**

Mr. Whitney said the committee would seek additional details and observations.
