

# BRIGHT OBJECT IN THE SKY

One day last week a very bright object was seen in the sky, reports coming from Armidale, Inverell, Taree and other centres to this effect.

Mr. A. Jenkins, of Rocky River, informed us that he saw the object. It was about as a full moon just coming over the horizon and appeared more like a strong car light seen at a distance.

The time was about 5.30 p.m. and the object appeared in the north-east low down to the horizon. It seemed to be travelling on an even plane either, directly towards him or away from him and its light was seen for about half a minute, afterwards breaking up into three or four bright sections and then disappeared.

Mr. Jenkins said he'd never seen anything in the sky quite

seen anything in the sky quite  
like it.
