

FLYING SAUCER WAS REAL

NEW NORFOLK residents saw a flying saucer during the weekend — and it wasn't a weather balloon, a flock of starlings, or a cloud effect.

It was a real flying saucer, made by the Tasmanian Model Flying Club.

Controlled by the club's president (Mr. J. Taplin), it looped and dived in the approved style.

It showed its paces at a combined model flying display, organised by the Northern Suburbs and New Norfolk Model Aero Clubs.

Another highlight of the display was the flying of a large model stunt plane by Miss Kay Delaney. It was the first time a girl has been seen flying a model in Tasmania.
