

## **Flying Saucer Was Mirage**

**New York: United States Air Force Sabre jets roared over Moscow early yesterday in pursuit of a "flying saucer".**

**But all they did was wake up most of the town's 10,000 citizens and the only fire they drew was language from angry Muscovites.**

**It was Moscow, Idaho, not Moscow, U.S.S.R., and the "saucer" reported by two volunteer ground observers as a "bright, flat object, perhaps 2000ft. in diameter", was dismissed by the Air Force as a mirage.**
