

Traced Course Of Flying Saucer

LONDON, November 19—The British War Office today officially recognised the flying saucer.

A War Office report said that an anti-aircraft unit in south-east London, on November 3, picked up a signal on its radar screen unit and followed the track of the "object" which appeared "circular or spherical white in colour." The object was also seen through a telescope by men of the same unit the same day.

The Air Ministry said tonight that all reports of possible "saucers" were investigated, but in 95 percent of the cases there was a natural explanation. They were either meteorites or reflections of sunlight or moonlight on aircraft.

It added: "But in the remaining cases there was no explanation. There is no conclusive evidence for saying that flying saucers do or don't exist."
