

# VISIT BY VENUSIAN FLYING SAUCER PILOT, SAYS AUTHOR

**LONDON.**—George Adamski has not only seen a “flying saucer” but has met a man from one which swoops down to earth from the planet Venus. So he says in a book just published, “Flying Saucers Have Landed,” of which he is co-author.

Mr. Adamski lives near the famous observatory on Mount Palomar in California, but he follows his scientific hobbies from his own back garden.

Several times, he relates, he has journeyed into the desert to investigate reports of “saucers,” and for six years found nothing.

**But on November 20, 1952, “I first made personal contact with a man from another world. He came to earth in his space craft, a flying saucer. He called it a ‘scout ship’.”**

The place of the meeting, he explains, was on the Californian desert 10 miles from Parker, Arizona.

A mother ship—cigar shaped, silvery and gigantic—came first into view but vanished when American planes flew over.

Adamski and six companions—whose names he gives—waited and watched.

watched.

### **"BRILLIANT FLASH"**

Not long afterwards, he nar- rates, there was a brilliant flash and "a beautiful small craft ap- peared to be drifting between two mountain peaks and settling half a mile away.

**"Then a man with long hair appeared and beckoned. I was in the presence of a man from another world.**

"The beauty of his form sur- passed anything I have ever seen. He looked about 5ft. 6ins. and 28 years old.

"His forehead was large; his eyes grey-green and slightly aslant. His cheekbones were high."

### **HAIRLESS FACE**

He had a face "as hairless and beautiful as a child's. His sandy, long hair hung shoulder-length in waves, glistening more beautiful than any woman's."

There was the language pro- blem of course, says Adamski, but he got over that by "gesturing and telepathy," and so learnt that the handsome stranger had come from Venus.

**Another thing he learnt was that the Venusians had come to Earth to study its radiations, "because atom bombs were af- fecting the outer spaces."**

## LIVE ON OTHER PLANETS

Adamski says he found out that people like human beings live on other planets; they visit the earth, but not populated areas, because they fear violence.

Their flying saucers are operated by "attraction and repulsion." They are spaceships that come from a 'mother ship.'

Adamski was not allowed to peer inside the 'flying saucer,' and the Venusian was so modest that he barred having his snapshot taken.

**But he did take from Adam-**

**ski earlier a film he had exposed, and, adds Adamski, promised to return it.**

Sure enough, it came back 23 days later—the picture had been replaced by a strange photograph and a symbolic, undecipherable message.

### SCIENTISTS INTERESTED

Adamski's story and the photograph he took of the craft that delivered his film are still being "vetted" by scientists.

Adamski reports that they have listened to the tale "without expressing any doubt."

And so far they have not yet publicly announced that they believe in Venusians—or the flying saucers, for that matter.
