

## **"No Authentic Evidence" On Flying Saucer Reports**

**WASHINGTON, Tuesday.**

**No authentic physical evidence has been received establishing the existence of space ships from other planets, a United States Air Force report declares.**

**It says that unexplained aerial phenomena—"flying saucers"—are not a secret weapon, missile or aircraft developed by the United States.**

**But the Air Force, admitting that a percentage of the now dwindling rate of "flying saucer" reports have yet to be explained, announces that it has installed 75 "flying saucer" cameras at bases in 33 States to seek explanations of radar-confirmed objects reported streaking through the skies.**
