

Eye Injured By Flying Saucer

Mr. Ivan McDougall, of Wehl Street, Mount Gambier, suffered an injury to his right eye over the week-end, when a toy "flying saucer" struck him.

Mr. McDougall was showing several children how to throw the toy when the accident occurred. It is thought that the flying saucer struck him after bouncing against a wall.

He was driven by his brother-in-law, Mr. Ian Hay, to the Adelaide Hospital on Sunday night. Both eyes are now bandaged and it will not be known for about 10 days whether his sight will be affected.
