

# Have YOU Seen Any?

MELBOURNE, Wednesday : The Civil Aviation Department and the Australian Flying Saucer Investigation Committee want people to report "unidentified objects" in the sky.

Representatives of both organisations yesterday urged people who saw strange objects to report them.

But they discounted theories that the "objects" came from another planet.

Captain Douglas Barker, an ANA pilot, last Friday reported that he had seen a mushroom-shaped object flying fast through clouds

over East Kew.

On Sunday other people reported a "spherical" object a few miles from where Capt. Barker saw his "flying mushroom."

Aviation experts claimed that Captain Barker had seen a Convair testing its landing gear.

They said the other people had seen a balloon from

the Laverton RAAF Station.

The Melbourne superintendent of Air Traffic (Mr. R. M. Seymour) today said: "People who see unidentified objects in the sky should

PEOPLE WHO SEE UNIDENTIFIED  
ed objects in the sky should  
not be frightened to tell us  
for fear of being ridiculed.  
"When they report we can  
check to see if any plane po-  
sitions fit the time and place  
the object was seen."
