

## **More Stories of Saucers**

**Melbourne:** Citizens last night and today inundated air traffic control officers at **Essendon** with "flying saucer" and "flying mushrooms" reports.

With more than 30 such reports on his table, the superintendent of air traffic control (Mr. C. Seymour), who yesterday said such reports would be welcomed, today asked that people who saw "unidentifiable objects" in the sky should not ring airport traffic controllers, but should write their reports to the department's public relations officer.

Among those who submitted reports today were some members of the department's own staff. The reports were nearly all of occurrences seen on various dates in the past.

"Apparently the fear of ridicule has stopped many people making earlier reports," said Mr. Seymour.
