

## **Not a Saucer, nor a Mushroom . . . but Flying**

With current reports in mind of the sighting of a "flying saucer" or "mushroom" in Victoria, Gawler residents can be excused if on a sunny day over the Xmas break they have looked up into the sky and thought "Gosh, there's one!"

But a longer look soon explains the silver object circling or hovering up in the blue. Just a glider operating from Gawler airstrip—with the sun shining on it very, very much like a "saucer," a "mushroom," or what have you, if they really fly.
