Another "Saucer"

ANOTHER report of a "flying saucer" was received yesterday, this time from a traveller fishing on the Gippsland Lakes early in the morning. He is Mr. D. R. MacDonald (54) of Government Rd., Paynesville, on the Gippsland Lakes. He said that as he was crossing the lakes at 3.30 a.m. with two companions, he saw the object flying about 1000ft. above the ground. Mr. MacDonald said it looked like a bright new ball-bearing cut in halves. It had a flat, round bottom with a hemispherical top. It had no wings. It came to within half a mile of the boat, flew past, and then turned east.
