

# AIR FORCE SEEKS SERIOUS SAUCER - SEERS

**MELBOURNE, Fri.**—“We want all people who firmly believe they have seen an unidentifiable object in the sky to report to us,” an R.A.A.F. spokesman said today.

“Investigations take time and money so we don't want reports from people who only thought they had seen something,” he said.

The officer said today that the Air Force was taking “flying saucer” reports in Australia seriously.

“We are anxious to get to the bottom of the reports. We have an open mind but who are we to say the public is just seeing things,” he said.

**Today's statement was the first ever made officially by the R.A.A.F. that it is investigating flying saucers.**

The investigations have been going on since 1947.

The officer said: “We don't know if we are the only planet with life on it or if there are better brains in the universe than ours. We should be flying

into space ourselves within 50 years.

**“Our investigations show that 10 p.c. of the people reporting to us have definitely**

porting to us have definitely seen something. In addition, many of the reports correspond.

---

"Many of the people making the reports should know what they are talking about, especially pilots," he added.

The R.A.A.F. does not publish the reports to prevent people from making faked sightings and so that a true and accurate check can be made on similar observations.
