

R.A.A.F KEEPS CHECK ON ALL SAUCERS

MELBOURNE. — The R.A.A.F. reveals that it has been investigating flying saucer reports since 1947.

A spokesman says that in the last few years hundreds of reports have been received. All were treated confidentially.

He added: "We are anxious to get to the bottom of the reports. We have an open mind.

"We don't know if we are the only planet with life on it or if there are better brains in the universe than ours.

"We should be flying into

space ourselves within 100 years.

"Our investigations show that 10 per cent. of the people reporting to us have definitely seen something--- and many of the reports correspond.

"And many of the people making the reports should know what they are talking about --- especially pilots."

Each report is investigated by an Air Force intelligence officer and 24 ques-

telligence officer and 24 questions put to the person making the report are tabulated in a two-page "Report of Aerial Object" Observed form.

The RAAF then investigates the report. A check is made with the department of civil aviation and meteorological and astronomical experts.

AT MURWILLUMBAH.

MURWILLUMBAH: Two young sons of a former Civil Aviation Department employee were reported on Friday night to have seen a large circular object flying over the Numinbah Valley.

The boys, aged seven and five, told their father, Mr. Alfred Arena, of Numinbah, that the object travelled at a height of about 1000 feet.

a height of about 1000 feet.
