

Now it's a flying banana?

A strange, banana-shaped object flying at terrific speed just before midnight last night was reported to The News today by Mr. C. D. Dallow, of Strathmore street, Ferryden Park.

Mr. Dallow was returning from the beach when he noticed the object, with a number of lights glowing along the elongated body, flying from the hills, near Magill, out to sea.

"I was looking at the sky for any sign of a weather change, when I noticed the object," Mr. Dallow said.

"It was visible for seven or eight seconds. It appeared to dip down first and suddenly rise again before moving along the horizon towards the sea.

Mr. Dallow will submit a detailed report for consideration by the newly formed Flying Saucer Investigation Committee.
