

SHE MAY HAVE ANSWER

Housewife joins saucer panel

The Flying Saucer investigation committee sponsored by The News and The Mail was today joined by another two members.

Prof L. G. H. Huxley, professor of physics at Adelaide University, wired from Canberra Science Congress yesterday that he would join the committee as a full-time member.

Prof Huxley had earlier agreed to be a consultant.

To present the woman's angle at discussions Mrs. J. Neale, Linden Park housewife and mother has asked to become a member.

Mrs Neale said she felt that because she knew nothing of sky phenomena and had never seen a flying saucer, she may be able to bring a completely new and detached viewpoint.

The News aviation corre-

spondent Frank Shaw will act as liaison between the committee and the public

The committee so far is: Prof. Sir Kerr Grant, former physics professor at Adelaide University;

Prof. L. G. H. Huxley, present physics professor;

Mr. R. M. Rechner, war-time pilot and TAA manager in SA;

Flight Lieut. R. Miller, RAAF Intelligence Officer at Mallala;

Mrs. Neale, and Mr. Frank Shaw.

The Weather Bureau chief, Mr. R. Hogan, will

Climate of Courage." See P. 17.

act as meteorological consultant.

The committee will study and discuss all reports and try to find a satisfactory explanation of the mysterious objects reported in our skies in recent weeks

Readers are invited to send reports to The News and The Mail to be put before the committee.
