

## WOMAN CLAIMS FLYING SAUCER FLEW OVER WOLLONGONG

*An elderly Wollongong woman reported last night that she had seen a "Flying Saucer" moving westward over Wollongong shortly before dusk.*

The woman, who said she wished to remain anonymous, last night told a "Mercury" reporter she was walking home about 6.40 p.m. when she saw in the sky a shining silver disk.

"It was about the height an aeroplane travels and was about the size of my two hands," she said.

"A long spike was projecting from the front of it," she added.

"I was looking for someone to show it to to prove I wasn't imagining it, when I saw a man riding a bicycle.

"I pointed towards the object, but the man just looked and rode on.

"Some people in a car went past, but they also only looked and drove on when I pointed towards the disk.

"I think it all has something to do with war," she went on.

"First these things appeared in Europe and now they're there."
