

## SAUCER— BALLOON?

SYDNEY, Sat. — Another "flying saucer" has been sighted over Adelaide. Mr. W. H. Hughes, of Croydon Park, said he saw a bright yellow, round object at 12.5 a.m. to-day.

Mr. Hughes said the object moved across the sky at terrific speed and disappeared after five seconds. It was moving in a northerly direction.

The Deputy Director of the Weather Bureau, Mr. J. Hogan, said to-night that most "flying saucers" seen over Adelaide recently were actually meteorological balloons.
