

Support for report on flying saucer

Mrs. J. Allen, of Seaview grove, Blair Athol, today supported a flying saucer reported at 12.5 a.m. on Saturday.

She said her husband saw the sky object while standing in front of their home at 12.5 a.m.

He told her it came from the east, described an arc, and then "whizzed" away to the west.

It was a translucent, deep orange color and round shaped.

About three minutes before her husband sighted the object he saw what appeared to be a meteor travelling in the same direction, at about the same spot.

This left a long, thin luminous blue tail.
