

MIGRANT REPORTS A SAUCER

Another flying saucer has been reported over SA.

Mrs. P. Brook, of Gepps Cross Migrant Hostel, said she saw it at 11.55 a.m. today.

Mrs. Brook told The News:

"I saw a bright object high up and travelling very fast between north and north-west in the direction of Parafield.

"It looked like a falling star, but it was too far away to define its shape.

"After travelling a straight course it zig-zagged violently four times, then appeared to fall towards the horizon into a small cloud.

"It was definitely not an aircraft," she said.

Parafield airport control reported no weather balloons or aircraft were in the area at that time.

Mrs. Brook's report will be submitted to the recently formed Flying Saucer Investigation Committee.
