

## **This object was fiery**

Latest flying saucer report comes from Kevin McQuillan, 18, of Main North road, Pooraka.

Today he reported having seen a strange, fiery object in the sky, near Gepps Cross, at 9.20 p.m. yesterday.

He said Miss Barbara Walsh, 19, of Frederick street, Cross Keys, who was with him, also saw it.

"It appeared to be flat at the bottom and oval at the top," Mr. McQuillan said. "It was shooting flames and travelling from north to south at terrific speed.

"We saw it approaching and within five or 10 seconds it had disappeared. That indicates how fast it was moving. It was high up, but I could not give an estimate of its height."
