

## **Largs saw a kite, not a 'saucer'**

"The 'flying saucer' seen over Largs last night was an ordinary kite flown by two lads," said Mr. W. Boyce, of Sefton street, Largs, today. It was reported to have been seen by four different groups of people.

About 10.30 last night, 10 relations at Mr. Boyce's house heard a flapping noise in the sky. It sounded like the flapping of a large bird's wings.

Soon, a faintly visible object was seen darting about at what appeared to cloud height. They concluded it was a "flying saucer."

However, the "flying saucer" soon swooped and became entangled in overhead electric wires. The string later broke, and a kite came down in open ground opposite the house.
