

2nd "Saucer" Story In Fortnight

DARWIN, Thursday.—The second "flying saucer" story in a fortnight came from Alice Springs to-day

A number of residents heard what they thought was a jet plane going over the town about 4.30 a.m.

Mr. K. Heaslip, one of six people who claimed to have heard a "flying saucer" on January 15, said the description fitted exactly what he heard previously.

Inquiries from the Civil Aviation Department to-day proved there was no plane in the area.

The Alice Springs paper last week published a photograph taken by an anonymous photographer of what he claimed was a "flying saucer" flying low over the town.

Some residents do not discount the theory that a guided missile from the Woomera rocket range might have flown over.
