

Strange Flying Object Seen Near Maryborough

MARYBOROUGH: An unidentified flying object yesterday afternoon appeared to "accompany" a cane train part of the way from Baddow to Maryborough before abruptly changing direction and disappearing at a fantastic speed.

The incident was related by the driver of the train, Mr. A. Jesse, of 122 Woodstock Street, who said that his fireman, Mr. G. Jensen, noticed the object first as the train was leaving Baddow station at 4.24 p.m.

Mr. Jesse said that the object appeared to be of square cut shape and was devoid of wings, tail propellers and other conventional aviation aids.

It was so brilliantly lit—apparently by the late afternoon sun—that it was difficult to look straight at it for long. No engine noise was heard.

Although he could not estimate the height or speed of the "thing," Mr. Jesse felt that it was travelling high and faster than the average plane.

He said that the object appeared to glide along more or less parallel to the railway line until it was roughly over Pallas Street.

Then it veered away to the north and disappeared in a matter of seconds.
