

IT'S A PITY !

— : 0 : —

"Flying saucer" conscious folk at Alice Springs gazed at a thin white streak which moved across Centralian skies, very high over the town on Tuesday morning. Phone wires ran hot as enquiries were made, and one lady hastened to the "Advocate" from the East Side. The queer thing in the sky had frightened her chickens, she said. Following all the other "saucer" reports, we thought we had something this time. There were dozens of witnesses, but, it was a Canberra jet bomber flying over at 42,000 feet Air Radio told us when we enquired. Such a pity.
