

# **"SAUCER" MYSTERY SOLVED**

★ **T**HE "flying saucer" seen over Morwell on Wednesday of last week proved to be a meteorological balloon released from Melbourne. Three Commercial Road State School children reported that they had seen a flashing object in the sky at about 12.45 p.m. which appeared to them to emit flame and sparks.

The balloon landed on the Traralgon South property of Mr. H. Keon and was located by Mr. and Mrs. Blackman and sons, Terry and John. What appeared to be flames proved to be red pieces of cardboard trailing from the balloon.
