

Flying Saucer At Coolac ?

Wierd Object Seen By Village Residents

There was great excitement at Coolac yesterday, when a wierd object, described as a flying saucer was seen in the sky at about 4 p.m.

Mrs. H. Chilton, who watched the object sail across the sky travelling almost in a direct southerly direction, said it was a round white object with a tremendous tail.

The object moved at a fairly high rate of speed, was clearly visible, and appeared lower than aircraft usually fly.

Other Coolac residents who saw the object described it as a flying saucer with a comet like tail.
