

# Strange object in Qld sky

**BRISBANE, Tues.:** A mysterious object, flying at hundreds of miles an hour, has been reported from the Roma district, 318 miles west of Brisbane.

Reputable people reported it over a stretch of 40 miles a little before midnight on Saturday.

All say it was travelling at only 100 to 200 ft.

A grazier said it turned over his house, was yellow, the size of a sedan car, and noiseless.

A stenographer said it seemed to be V-shaped, with two red lights behind.

A fishing party said it shot into view at 100 to 200 feet, then climbed rapidly.

No planes were scheduled in the area.

Several townspeople reported basically similar experiences.
