
STRANGE OBJECT SEEN IN SKY

Brisbane, May 18. — Residents of Roma, 318 miles west of Brisbane, report seeing a strange V-shaped object sweeping through the air above the town at the week-end.

At least half a dozen of Roma's reputable citizens from points as far apart as 40 miles, claim to have seen the object.

They set its time of appearance at 15 minutes before midnight and say that it was travelling at a speed of hundreds of miles an hour at a height of only 100 to 200 feet in a south-easterly direction.
