

"SAUCER" SEEN AT BUNDABERG

BUNDABERG, Thurs.—People in Bundaberg and district yesterday reported seeing or hearing a strange object which they believe may have been a flying saucer.

At about 1.45 p.m. a Bundaberg woman and several Gin Gin residents claimed they heard a peculiar noise overhead.

A South Bundaberg woman said her attention was attracted by a strange rumbling noise. The noise was *quite different from that* of the engines of an aeroplane.

At a very high altitude in the north west she observed a circular silver object. It appeared to be gaining height at a terrific speed until it eventually disappeared from her sight.

MARYBOROUGH: A Bauple resident, Mr. Sheldon Stringer, who heard a mys-

terious noise on Tuesday morning but could not trace its origin, today at 1.35

its origin, today at 1.35 p.m. heard a similar sound and saw an object at a great height in the sky travelling at terrific speed in a southerly direction.

Mr. Stringer, who watched the object through field glasses for about 30 seconds, said it was shaped like a plane.

ROCKHAMPTON: Several more people today said they had sighted strange objects in the sky on Saturday night.

This followed publication of reports of a fast moving object seen in the direction of the Athelstane Range.
