

FLYING SAUCERS

To add to the number of "flying saucer" reports, here is one of local significance.

Consequent upon reading the various reports in the Press, Mr. T. H. Dennis, of Laravale, called in at the "Times" office last Wednesday and said, "I was looking at a jet plane flying westward at about 11.30 a.m. last Tuesday, and in its trail was what I took to be a circular formation of white smoke which easily could be taken for a flying saucer."
