

'Green' Flying Saucer Seen In Melbourne

MELBOURNE—A huge, oval, Greenish coloured flying saucer was reported to have been seen by several people in the East Malvern district on Saturday.

SOME residents said the saucer flew at terrific speeds at slightly higher than tree top level before climbing rapidly and disappearing.

Mr. David Reese, Wilmot St., East Malvern, said the object emitted a buzzing noise and gave out a yellowish light.

Several objects seen at window-like cavities resembled human beings.

A description of the object by several people who saw it agreed in basic details.

Mr. Kevin Phillips, Barkly St., St. Kilda, said the disc

swooped low over houses in Dandenong Rd.
