

Shapes Like People In Flying Object

MELBOURNE, May 30. — A flying object reported over the Melbourne suburb of East Malvern early today seemed to have people in it. Mr David Reese, of Elwood, said to-night.

"I could distinctly see dark shapes, like figures, in the object," he said. "If I had seen the same shapes in an aeroplane, I would have said they were people."

Mr Reese said he and his friends first looked into the air when they heard a buzzing sound.

"The object was dark with faint streaks of vertical light on the side. The outlines of what looked like people were darker than the rest of the object."

Mr Reese said that descriptions, which he and his friends later wrote down about the object, coincided almost exactly.
