

He saw shape like "saucer"

Terang, Monday

Noorat baker Les Squires thinks he saw a flying saucer at 10 a.m. Friday at Glenormiston North, seven miles from Terang.

"The sky was overcast. I saw a round, dark shape in the sky for about three seconds, and it made a squealing sound as it disappeared into the cloud," Squires said today.

He thinks the object was flying at about 5,000 feet. "Of course, it may have been a jet plane," he said.
