

FLYING SAUCER OVER ENGLAND

A Nocturnal Visitor

INDEPENDENT OBSERVERS AGREE IN DETAIL

London, June 13. — Two people described to the "Sunday Despatch" a huge circular flying machine surrounded by a brilliant flame coloured light which was seen hovering over hamlets in Hampshire and Somerset during the week.

The "Sunday Despatch" says: "The Air Ministry is puzzling over this extraordinary phenomenon which was described as the perfect example of the flying saucer observed from only 30 yards. So far no natural cause has been found."

Nigel Frapple (18) and Doreen Heffer saw the object independently and hours apart.

Both agreed that it was circular and emitted a flame-coloured light from a central cockpit, that it was 50 ft. across and hovered gently for more than a minute and then sped off practically silent except for a slight swish.

Frapple was cycling home at 2 o'clock in the morning.

at 2 o'clock in the morning. He jumped from his bicycle and hid behind a hedge and watched the object hovering over a field.

Frapple said: "The body seemed to be metal but I could not make out any marks on it. I watched for more than a minute and tried to follow it on my cycle when it moved, but it was too fast."

Miss Heffer saw the object from her window. At first she thought it was a forest fire.

The "Despatch" also said that the Swiss Air Ministry had reported an illuminated object observed circling over Zurich on Friday night.
