

# Many People See "Things" In The Sky

SYDNEY, Tues.—Sydney is getting a rush of flying saucer reports.

Last night and early today scores of people living in different suburbs reported having seen "things" in the sky.

The Weather Bureau says that they were not natural phenomenon.

The Government Meteorologist (Mr. K. McKinnon) saw "a light, about 2,000ft. up, that hovered for several minutes."

Mr. Jim Fawcett, manager of a flying school at Illawarra, reported having seen a light "about 3,000ft. up, bigger and brighter than any star."

## "Long Object"

Others said that the light frequently changed colour.

Later, people said that they saw a long, blue object, shooting blue flame, flying over Sydney this morning.

Mr. William Mitchell, of Little Bay, said that it looked like a railway carriage and was about 600ft up.

600ft. up.

Miss Amy Phillips, of Maroubra, described it as 30ft. long and 10ft. wide.

Airport authorities said that no planes were in the areas when the objects were seen.
