

# Flying Saucer

**Perth: Three East-West motorists have reported seeing a flying saucer manoeuvring in the sky over the Nullarbor Plain.**

They watched it for 15 minutes as it flew about, obviously under control."

It appeared as a brilliant white light against a background of dark storm clouds, and disappeared suddenly.

On their arrival at Kalgoorlie late last night the motorists, Mr. T. A. Mulhearn, his wife, and 23-years-old son (Paul), of Sydney, said the saucer appeared north-west of Eucla on Sunday night. They thought they saw fins, or elevators, on each side move up and down when it came within five miles of them at no more than 1000 feet.

Another party of motorists reported a similar object over the sea half an hour

**over the sea half an hour  
earlier the same night.**
