

FLYING SAUCERS COMING CLOSER ?

Several people in Guyra claim to have seen what they claim was a flying saucer.

Last Sunday night Mrs. S. Seward, of Nelson Street, Guyra, was outside her home when she noticed a brilliant light in the sky "something like a street lamp". She was so surprised that she called out the rest of the family who watched the spectacle for about 10 minutes. One of the family obtained a pair of binoculars and said that there were spurts of fire on the edges of the object.

Before disappearing the lights changed from red to a brilliant green. One

to a brilliant green. One
observer said it was egg
shaped.

Others in the district
noticed the phenomenon.
One of these was a Shire
employee, Mr. E. Chap-
man, whose description
tallied with that given
previously.
